Continuation of 11. does NOT place the application in condition for allowance because:

(i) The revised affidavit/declaration filed on 10/14/2005 is insufficient to establish diligence from a date prior to the date of reduction to practice of the Travis Publication reference to either a constructive reduction to practice or an actual reduction to practice. The scope of the declaration or affidavit is not commensurate with the scope of the claim(s), that is defining an affinity space coordinate for each of a plurality of items available for sale, created package template including at least one mandatory element schema having an associated affinity space description, dynamically generating for sale by comparing, with a computer, the affinity space coordinate for each of the plurality of items with the affinity space description associated with the package templates and if the comparison step reveals a match presenting the dynamically generated package for sale, said package being defined at east in part by the package template and including at least one item with a matching affinity space coordinate.

The applicant, on page 2,in the third paragraph of the Declaration, has indicated that the package segment corresponds to affinity-space coordinate as exhibited on pages 20, 23, 25 and 31of Exhibit A and pages 17& 18 of Exhibit B but this fact is not supported by the applicant's disclosure. The applicant's specification filed on 3/1/2000 does not state or define categorically that the package segment are affinity space coordinates or vice-versa.

Also, the affidavit and the exhibits submitted does not show the following steps of:

defining an affinity space coordinate' and

dynamically generating for sale by comparing with a computer the affinity space coordinates for each of the plurality of items with the affinity space description associated with the package templates and if the comparison reveals a match presenting the dynamically generated package for sale.

(ii) The evidence submitted is insufficient to establish a conception of the invention prior to the effective date of the Travis reference. While conception is the mental part of the inventive act, it must be capable of proof, such as by demonstrative evidence or by a complete disclosure to another. Conception is more than a vague idea of how to solve a problem. The requisite means themselves and their interaction must also be comprehended. See Mergenthaler v. Scudder, 1897 C.D. 724, 81 O.G. 1417 (D.C. Cir. 1897). In this case, the scope of the declaration or affidavit is not commensurate with the scope of the claim(s), that is defining an affinity space coordinate for each of a plurality of items available for sale, created package template including at least one mandatory element schema having an associated affinity space description, dynamically generating for sale by comparing, with a computer, the affinity space coordinate for each of the plurality of items with the affinity space description associated with the package templates and if the comparison step reveals a match presenting the dynamically generated package for sale, said package being defined at east in part by the package template and including at least one item with a matching affinity space coordinate.

The applicant, on page 2,in the third paragraph of the Declaration, has indicated that the package segment corresponds to affinity-space coordinate as exhibited on pages 20, 23, 25 and 31of Exhibit A and pages 17& 18 of Exhibit B but this fact is not supported by the applicant's disclosure. The applicant's specification filed on 3/1/2000 does not state or define categorically that the package segment are affinity space coordinates or vice-versa.

Also, the affidavit and the exhibits submitted does not show the following steps of:

defining an affinity space coordinate' and

dynamically generating for sale by comparing with a computer the affinity space coordinates for each of the plurality of items with the affinity space description associated with the package templates and if the comparison reveals a match presenting the dynamically generated package for sale.

(iii) The 37 CFR 1.131 affidavit or declaration must contain an allegation that the acts relied upon to establish the date prior to the reference or activity were carried out in this country or in a NAFTA country or WTO member country. See 35 U.S.C. 104.
